

Some of us were still tired when we first arrived in Haneda Airport  
Even though I was exhausted from the flight, I was impressed by the beautiful landscape.  
The scenery between city and country side looked amazing.

Tamagawa highschool was a pleasant experience. Our host-students/Exchange-Partners/buddies were very welcoming, even if some were shy at the beginning. In the past 2 weeks at school I personally had a good experience and had a good time. The people were very friendly and funny. The school campus was impressively big with a seemingly unending amount of buildings, since they are building more each year. I liked the planetarium and the artorium the most.

Personally I made a lot of positive memories of Japan overall. The city had a lot to offer. From the colorful, atmospheric resortland of Disneyland tokyo to various traditional and cultural places such as Okinawa. I enjoyed it thoroughly.

There were also some places outside tokyo I have found very fun. For example Hakone. The hotel we stayed at was very nice. The rooms, onsen and overall the entire stay at hakone was a relaxing experience. The open-air museum we visited the next day had many interesting exhibits and architectures. I have found myself enjoying the park and its exhibition of statues and buildings. Having said that I also want to add that the food in Japan was very delicious. I especially liked miso-ramen and tempura but other foods like sushi and onigiri, monja, yakisoba were also tasty.

Overall the Japan-Exchange was very fun and I'd go again if I could. Our stay was very enjoyable and I hope the future exchange student's are also going to have a wonderful time in japan.
